

MODERN TRENDS MEET INDUSTRIAL FLAIR

Linear textures have stood the test of time though the selection available to the UK market remains slim. At Mega Glass, in keeping with our one-stop-glass shop philosophy, we have gone the extra mile to ensure that we go beyond tradition to ensure your vision is met with our core variants kept in stock.

At Mega Glass, we source our products globally to ensure that your objectives are met in choosing the correct specification to suit your needs. In stocking four options to the traditional reeded format, we have taken tradition in to the 21st century.

With options to suit in either float or low iron (neutral in colour); in either 4mm or 6mm thickness (others available on request); with either narrow, medium or wider flutes; in larger format sheet sizes (up to 3.2m), our linear range offers choice to suit your design and application.

All of our linear range can be polished, machined and toughened whilst most other glass processing fabrication is also compatible, offering true flexibility on production and effective compatibility to most designs.

Key applications include Airports, Stations, Museums, Offices, Hotels, Restaurants, Partitions, Commercial Washrooms, Domestic Kitchens and Bathrooms.
