

THE PERFECT WORKTOP SURFACE

Manufactured using optically clear low iron glass, our scratch resistant product is non-porous and provides a fantastic alternative to standard polished worktops, Corian and Stone. Not only do they look stunning, but they are extremely strong (toughened to BSEN 12150), hard-wearing and hygienic. The versatility of the scratch resistant coating combined with a wide range of colour options, make them suitable for high use, functional areas both commercially and domestically.

Our scratch resistant glass worktops are available in 10mm thickness and can be produced in any colour and a large number of special effect finishes to provide unlimited design opportunities.

Our scratch resistant glass worktops are manufactured from drawings, or to template, to ensure a perfect fit. All standard worktop fabrications options are possible including various polished edge finishes, drainer grooves, sink/hob/tap cut outs.

The product provides a unique solution to the worktop market as it is resistant to the buildup of scratches and marks from appearing on the glass surface through general use. Being thermally toughened, it's also resistant to high impacts on the worktop and can withstand heat of up to 300°C.

This specialist product is repellent to staining, yet can be cleaned with regular cleaning products.

Mega Glass Limited

Head Office and Factory - Unit 3, Foster Avenue, Woodside Park, Dunstable, LU5 5TA

PRODUCT SPECIFICATION

- UK processed toughened glass to BSEN12150
- Scratch resistant to Mohs 'hardness' value of 5 (harder than Marble & Corian; nearly as hard as Granite)
- Non porous
- Stock sheet size 3210 x 2250mm
- Will not degrade, discolour or peel over time
- Very strong – impact pendulum test rating of 1C1 under BSEN12600
- Resistant to marks, stains and scratching under normal use
- Glass can be cut, polished, beveled and have internal hob, sink and tap cut-outs
- Available in any colour and several finishes including Sparkles and Metallics
- Can be surface cleaned with any chemical product
- Can be back-lit

Option to have anti-bacterial coating added to increase resistance to growth of bacteria and other micro-organisms commonly present in the kitchens and bathrooms. It also makes the work surface even easier to clean and resistant to limescale build up.

WORK WITH US –

Our work speaks for itself and showcases the diversity and capabilities that we can bring and deliver to your project. Should you wish to speak to a member of the friendly team about a forthcoming project, please call Andrew (Supply Only) or Adam (Measure & Install) directly on 01582 809498
