

CREATING YOUR PERFECT BATHROOM

Our bespoke shower solutions give total flexibility. Every door and screen is manufactured to the highest specifications using our exclusive 10mm toughened safety glass and comes complete with premium hardware, seals and our anti-limescale/anti-bacterial coating. Glass panels are available as a stand alone fixture or a bespoke combination of screens and doors to suit any opening. Our bespoke shower solutions maximise space and transform any bathroom or wet room into a more functional and stylish space.

Made to measure to suit any opening, our bespoke shower solutions are also available in a variety of tints and in either a regular or satin finish. The bespoke options extend to the panel build-up to suit any requirement from a single screen to a combination of screens and doors in either a residential application or on commercial runs. Our extensive in-house machinery allows for hinge, handle and other bespoke cut out's to be implemented with precision to ensure ease of installation, by you or by us.

At Mega Glass, we can manufacture to tailored dimensions, drawings or CAD file on a supply only basis, or you can take advantage of our full measure, supply and install service.

Mega Glass has the ability to manufacture large quantities of shower doors and screens for contract call-offs, whilst also offering single item fixtures to the trade.

Our team can offer highly competitive tender prices as value engineered options for large new build and refurbishment projects.

Mega Glass Limited

Head Office and Factory - Unit 3, Foster Avenue, Woodside Park, Dunstable, LU5 5TA
