

Your Colour – Our Reflection

Combining the reflective qualities of mirrored glass with the infinite range afforded by the back-painted process, the innovation never stops at Mega Glass. Fabricated in one of our three state of the art dedicated spray booths, MG Colour Reflect presents endless possibilities through multiple colour libraries to suit a range of aesthetics in any interior or exterior setting.

A truly unique application, our pioneering approach enables us to listen and transform the most complex visions to reality. The interior and architectural market has been calling out for a solution to extend the conventional range of tinted mirrors beyond the 'norm' and we have reacted.

Available in flat colour, metallic or sparkle finish, Mega Glass's painted boundaries are further extended by our in-house spectrometer technology. Beyond the multiple standard colour library options, the specialist equipment allows us to colour match to the closest possibility, ensuring that MG Colour Reflect meets your exact requirements.

Produced in 6mm thickness, MG Colour Reflect is lightweight and compatible with all production processes guaranteeing ease of installation.. You choose the colour, we reflect it on glass!

Key applications include Splashbacks, Interior & Exterior Wall Cladding, Lift Lobbies

Mega Glass Limited

Head Office and Factory - Unit 3, Foster Avenue, Woodside Park, Dunstable, LU5 5TA
